

Overview

Working straight out of the box with no extra's required, the TSP100 FuturePRNT from Star Micronics is one of the lowest cost, highest quality printers available today. A high speed entry level POS printer supplied with all the cables, software, drivers and accessories needed to run it in the one box. With intuitive features and flexible components it's a welcome addition to the already comprehensive range of PoS equipment available from DED.

Receipt Re-Design Tool

With the Receipt Cropping Tool, unwanted embedded text and graphics can be easily removed from old receipts. Text can then be replaced with any TrueType font, new logo or graphic using the Image Import Tool.

Multi-Copy Tool

A unique 'intelligent' Multi-Copy Tool that allows up to 4 copies of receipts to be produced and images to be merged into different copies. Ideal for use in

environments where different receipts need to be printed from the same terminal - for example hospitality applications.

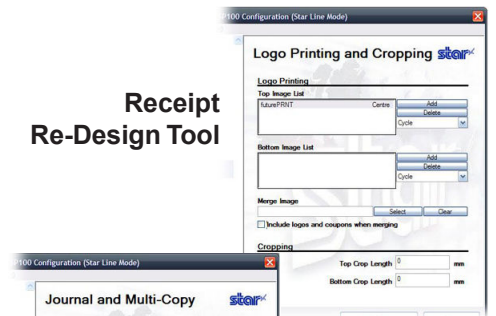

Coupon Marketing Tool

The Coupon Marketing Tool enables coupons to be printed based on pre-specified criteria. It allows the retailer to define specific keywords which "trigger" the printing of a certain coupon. Coupons can be designed as jpegs, gifs or bmps, then saved and loaded using the Image Import Tool.

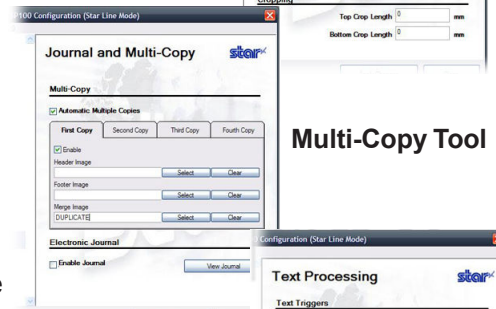

Auto-Text Reversal

For wall mounted or vertical (kiosk) operations, a problem can often be that the receipt is printed upside down. Whereas software modifications would usually be required to correct this problem, the TSP100 futurePRNT comes with unique Auto-Text Reversal™ feature in the driver, automatically capable of rotating the text so that it is the correct way up.

Auto-Text Reversal

Receipt Re-Design Tool

1. In the TSP100 FuturePRNT configuration utility, select '**IMAGE LIST**' from the menu. It is in here that images (.bmp, .jpg or .gif) can be added, to then be used to redesign the top and bottom of the receipt. This is also where you would import images to be used as coupons.
2. Click on '**ADD IMAGE**'.
3. Choose the image file required and then click '**OPEN**'.
4. Once the image is selected it will be opened in a tools screen where the size, monochrome conversion & transparency can be changed accordingly.
5. When the image has been formatted correctly, click on '**USE IMAGE**'.
6. Repeat this procedure for every image required. The images are stored in a .xml file on the local PC so there is no limit to the amount of images allowed.
7. To add an image to the receipt, select '**LOGOS & CROPPING**' from the menu on the left.
8. In the '**CROPPING**' section, enter in mm the amount of existing data (ie an old logo) that needs to be removed from the existing receipt.
9. In the '**LOGO PRINTING**' section add an image to the top of the receipt by clicking '**ADD**' by the '**TOP IMAGE LIST**'.
10. Click on '**USE**' to finish adding the image.
11. If required, repeat this procedure to insert an image under '**BOTTOM IMAGE LIST**' & '**MERGE IMAGE**'.
12. To finish, click on '**APPLY CHANGES**'.

Multi Copy Tool

1. In the TSP100 FuturePRNT configuration utility, select '**JOURNAL**' from the menu.
2. To enable multiple printed copy receipts, tick the '**AUTOMATIC MULTIPLE COPIES**' box.
3. You can now enable up to 4 copies by checking the '**ENABLE**' box in each tab. You can also insert a different image for the header, footer or background of the receipt.
4. To enable an electronic journal, tick the '**ENABLE JOURNAL**' box. This journal can be searched at any time in the future by date and receipts reprinted.
5. To finish, click on '**APPLY CHANGES**'.

Coupon Marketing Tool

1. As demonstrated in the '**RECEIPT RE-DESIGN TOOL**', coupon images can be added to the '**IMAGE LIST**'. We are now ready to set up '**TEXT TRIGGERS**' in '**TEXT PROCESSING**' which is found on the menu bar of the FuturePRNT configuration utility.
2. Click '**ADD KEY**'.
3. Type in the '**TEXT KEY**', this is the text that the printer driver will look for to trigger printing of the associated coupon. Enter the text to be used but note that it is case sensitive. Click on '**OK**'. The chosen text has been added to the keyword list.
4. Tick the '**CHANGE COUPON SETTING**' box and click on '**ADD COUPON**'
5. Now select a coupon image and click on '**USE**'.
6. The coupon has been added.
7. Repeat this procedure to add as many coupons as you wish, based on any number of text triggers.
8. To finish, click on '**APPLY CHANGES**'.

Auto Text Reversal

1. In the TSP100 FuturePRNT configuration utility, select '**VERTICAL MOUNT**' from the left hand menu.
2. Tick '**ENABLE VERTICAL MOUNT MODE**'.
3. To finish, click on '**APPLY CHANGES**'.
